DBMS Lab

AIM: Create a Student table (Roll_no, Name, Department) and write the queries to alter and update the table:

1. View the created table

```
CREATE TABLE Student (  
    Roll_no INT PRIMARY KEY,  
    Name CHAR(50),  
    Department VARCHAR(50)  
);
```

Student

Roll_no	Name	Department
empty		

2. Add another column to add Phone_no

```
ALTER TABLE Student  
ADD Phone_no VARCHAR(15);
```

Student

Roll_no	Name	Department	Phone_no
empty			

3. Change the datatype of column Name

```
ALTER TABLE Student  
MODIFY Name VARCHAR(100);
```

4. Add 10 new records to the table

```
INSERT INTO Student (Roll_no, Name, Department, Phone_no)  
VALUES  
(1, 'Siddharth', 'CSE', '1234567890'),  
(2, 'Arjun', 'ECE', '2345678901'),  
(3, 'Priya', 'CSE', '3456789012'),  
(4, 'Rahul', 'ME', '4567890123'),  
(5, 'Yash', 'CSE', '5678901234'),  
(6, 'Anya', 'EEE', '6789012345'),  
(7, 'Rohan', 'CSE', '7890123456'),  
(8, 'Kartik', 'CE', '8901234567'),  
(9, 'Varun', 'CSE', '9012345678'),  
(10, 'Meera', 'IT', '0123456789');
```

Roll_no	Name	Department	Phone_no
1	Siddharth	CSE	1234567890
2	Arjun	ECE	2345678901
3	Priya	CSE	3456789012
4	Rahul	ME	4567890123
5	Yash	CSE	5678901234
6	Anya	EEE	6789012345
7	Rohan	CSE	7890123456
8	Kartik	CE	8901234567
9	Varun	CSE	9012345678
10	Meera	IT	0123456789

5. Update the department of CSE students to AIML

```
UPDATE Student
SET Department = 'AIML'
WHERE Department = 'CSE';
```

Roll_no	Name	Department	Phone_no
1	Siddharth	AIML	1234567890
2	Arjun	ECE	2345678901
3	Priya	AIML	3456789012
4	Rahul	ME	4567890123
5	Yash	AIML	5678901234
6	Anyu	EEE	6789012345
7	Rohan	AIML	7890123456
8	Kartik	CE	8901234567
9	Varun	AIML	9012345678
10	Meera	IT	0123456789

6. Delete column Department

```
ALTER TABLE Student
DROP COLUMN Department;
```

Student		
Roll_no	Name	Phone_no
1	Siddharth	1234567890
2	Arjun	2345678901
3	Priya	3456789012
4	Rahul	4567890123
5	Yash	5678901234
6	Anyu	6789012345
7	Rohan	7890123456
8	Kartik	8901234567
9	Varun	9012345678
10	Meera	0123456789

7. Drop table

```
DROP TABLE Student;
```
